

Intro

You now have your team and the SRS- it's time to start planning like pros!

This is where the real teamwork begins. Channel your inner project managers and get ready to turn ideas into action!

Instructions

This is a group task.

Step 1

Hold a Sprint Planning Meeting. **All members of the team must attend the Sprint Planning Meeting** and actively contribute to the planning:

- Use the user stories from your SRS (submitted in Task 7.3P) to build your Product Backlog.
- Review and prioritise the user stories.
- Select a set of stories to implement in Sprint 1 (Weeks 7, 8, and 9).
- Decompose each selected user story into smaller, actionable tasks. Each task should:
 - Be clearly defined (what exactly needs to be done?)
 - Be independent (can be completed by one person)
 - Have an estimated time (max 8 hours). If a task seems too large to fit within 8 hours, break it down further.
 - Include the estimated hours in the task name, e.g., Express bootstrap [2], meaning it should take at the most 2 hours.

Step 2

Create a Trello board for your group (<https://trello.com/signup>) using at least the structure “Product Backlog, Sprint 1 Backlog, Sprint 2 Backlog, Doing , Done, Cancelled ” and add the tasks you created in Step 1. **Remember to make the Trello board public so that unit staff can access it.**

- Each team member should contribute **at least** ~50 hours of work for each group project.
- Each task requires a name, a description, an allocated person.

You must update your board during the sprint. Make sure it reflects your current progress.

Note: Please **do not use content from the examples given as is** (eg. The StreamFlix SRS), because our submission would then be flagged for high Turnitin similarity and may be cause for an academic integrity allegation.

Submission details and Delivery

Please upload a pdf document with your group’s Trello board link. Make sure the pdf renders the link correctly. It does not need to be clickable but should display the link correctly enabling the markers to access your Trello board.
